R8750-144 4/91

The World's Youth Data Sheet 1990

published by

WAY world assembly of youth

in collaboration with

the Population Reference Bureau, Inc.

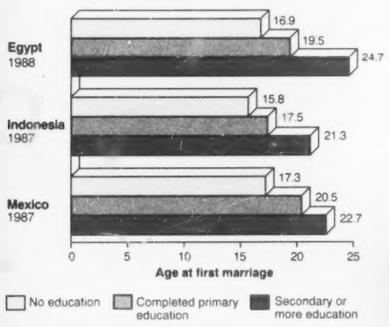
Funded by:
UNFPA
United Nations Population Fund

The WAY is an international coordinating body of national youth councils and organizations. It has consultative status with the United Nations and seeks to promote the interchange of ideas among youth of all countries, facilitate the collection of information about the needs and problems of youth, increase intercultural respect and foster international understanding, and assist in the development of youth activities and voluntary activities.

WAY Secretariat: Ved Bellahøj 4
2700 Brønshøj
Copenhagen, Denmark
Cable: Wayouth Phone: (45) 31-60 77 70

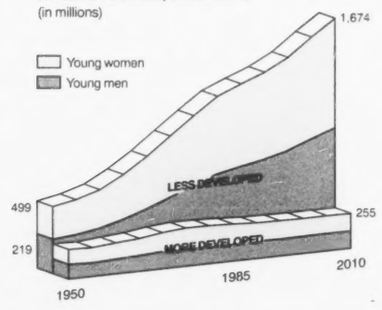
Many youth are getting involved in preserving the environment and recycling efforts, often leading the way.

Young Women's Education and Marriage



Increased levels of education often delay childbearing and family formation to an age where many youth will be better prepared.

Number of Youth, 1950 - 2010
(in millions)



The next 20 years will see an unprecedented youth "wave." The total number of youth 10 to 24 years of age will rise to almost 2 billion by 2010. By 2025, there will be as many youth in some less developed countries as there is total population today.

Ensuring the youth of today a higher level of education is a critical component of social and economic development in many less developed countries.

10-24, 1990 · 10-24, 2025 · Total pop. · % 10-24, 1990 · 10-19, 1990 · % Dying by 20 · % in School · Labor Force · % Married · Teen Births · TFR · GNP p.c.

The figures shown represent the most recent data or estimates available at the time of publication. Generally, data are based upon the publications and datafiles of the Population Division of the United Nations and the International Demographic Data Center of the U.S. Bureau of the Census, the United Nations *Demographic Yearbook*, estimates and projections of the World Bank, the UNESCO *Statistical Yearbook*, projections of the International Labour Office, the 1990 *World Population Data Sheet* of the Population Reference Bureau, country fertility surveys, and special studies. Please contact PRB for specific data sources. *Notes* — the *percent who die before age 20* was estimated from model life tables appropriate to each country's pattern and level of mortality. The *percent enrolled* is total secondary enrollment divided by the applicable age group, or gross rates; since students may not be attending a grade appropriate for their age, these rates can exceed 100 percent. The *total fertility rate* is the average number of children a woman would bear during her lifetime given the age-specific birth rates of a given year. A dash (—) indicates that data or estimates are not available. A (z) indicates that a statistic rounds to zero. Data or estimates over ten years old are shown in italics.

Prepared by Carl Haub and Machiko Yanagishita, PRB demographers. Valuable production assistance was provided by Martha Herr, Sara Adkins-Blanch and Eileen Hanlon. Photo credits — Mecklenburg County, Mecklenburg, NC: J.Isaac, UN PHOTO; F. Botts, FAO.
